

# Instructions for the use of the WC-Scanner

## Scanning : Step by step

Bonsaudo Jérémy, Mahe Thomas, Midouni Billel, Soumarè Shérine

### 1. **Connect the scanner**

You must connect To the same wifi as the scanner's

### 2. **Create a new project**

Click on the button "*Create new project*"

### 3. **Enter the project's specificities**

You must specify the name of your project, you can add a description, choose the number of pictures per rotation and the pictures' resolution.

### 4. **Confirm your choices**

### 5. **Start loop capture**

### 6. **Download zip**

You can either use your email address if the limit is not reached or export it by downloading the ZIP.

### 7. **Run Meshroom**

## Device test

There is a part named *Control* which allows you to test the Scanner beforehand

1. Connect the scanner
2. Go to the control screen
3. Select the rotation angle
4. Click on the direction wanted
5. Congrat! Your scanner should turn

## Delete project

If you don't need a project anymore, you can delete it.

It's really simple, you just have to follow those steps :

1. Go to the projects page
2. Find your project  
If you have too many projects, you can use the search bar to help you.
3. Click on delete and it's done.
